### **Swimming Pools Safe When Properly Maintained**

The Center for Disease Control says that COVID-19 cannot be transmitted through properly maintained pools and spas - "There is no evidence that COVID-19 can be spread to humans through the use of pools and hot tubs. Proper operation, maintenance, and disinfection (e.g., with chlorine and bromine) of pools and hot tubs should remove or inactivate the virus that causes COVID-19."

The Florida Swimming Pool Association reminds everyone that while staying at home during the current pandemic, it is a great time to enjoy swimming pools and hot tubs. Pools and spa owners should follow current guidelines of only allowing 10 people in the pool and deck area at a time. By limiting numbers of pool participants and allowing for space between one another, people will help keep each other stay safe while still enjoying the pool.

Proper maintenance, upkeep and testing of pools should be done at regular intervals and preferably performed and monitored by licensed professionals to ensure proper pool and public health. All entry and exit points into and out of the pool and deck area such as ladders, gates, and doors should be properly sanitized throughout the day.

Pools and spas are valuable resources to communities, allowing adults and children access to healthy and safe recreation and relaxation.

The Florida Swimming Pool Association is a trade association for the pool and spa industry in Florida. There are approximately 700 member businesses in 16 Chapters across the state. Members are required to abide by a code of ethics and to be properly licensed and insured. FSPA provides the industry with access to continuing education courses, information on current trends and issues, and an arbitration program and government relations representation. FSPA is governed by a Board of Directors.
